

LONGNECK BELLMOUTH SPIGOTS

New! Innovative Product

We at Ductware have come up with another productivity solution product. Two years in the development, our new LongNeck Bellmouth Spigot has a list of features that the others don't have.

- The first noticeable difference is the 180mm deep drawn shell, which has been designed with the quadrant 50mm from the Bellmouth providing adequate space for externally insulated duct.
- Then a generous 90mm at the connection end which allows much easier installation of flexible duct, with plenty of room to tape off and strap. This will greatly reduce the time on-site for flex duct installation
- With two roll grooved rings and fixing tabs around the top of the Spigot, this allows for the slight variations in the inner core of flexible duct between manufacturers
- Notably, these new LongNeck Spigots are DEEP DRAWN, not spun. So the rolled top edge has been designed to lower the likelihood of cuts when installing
- Two major benefits are around the Bellmouth itself with pre-drilled holes allowing the ease of installation of Tek® screws
- The pre-installed sticky backed gasket around the Bellmouth, eliminates the need to apply sealant, thereby producing a much better, leak-resisting seal
- The Spigot meets the construction standards with a coating weight of 275grams

And Competitively Priced!

AVAILABLE in diameters of 150, 200, 250mm **NOW**
with 300 & 350mm to come SOON.

- Available with Rossi Everlock and Twistknob Quadrant
- Available with or without Damper Blade & Quadrants

Pre-punched holes for faster on-site installation

Pre-Installed gasket eliminates the need for sealants

50mm offset enables insulation to fit between quadrant and duct wall

PRODUCT CODE	DESCRIPTION	UOM	Order Multiple
DW-SPG150D	LongNeck Bellmouth Spigot 150mm diameter	Each	pallet / 200
DW-SPG150N	LongNeck Bellmouth Spigot 150mm diameter NO damper	Each	pallet / 200
DW-SPG200D	LongNeck Bellmouth Spigot 200mm diameter	Each	pallet / 128
DW-SPG200N	LongNeck Bellmouth Spigot 200mm diameter NO damper	Each	pallet / 128
DW-SPG250D	LongNeck Bellmouth Spigot 250mm diameter	Each	pallet / 72
DW-SPG250N	LongNeck Bellmouth Spigot 250mm diameter NO damper	Each	pallet / 72

PRESSURE-MEMORY GASKET

High Quality Rubber Based Sealing Tape

Pressure-Memory gasket is a closed cell Neoprene rubber-based sealing tape. Excellent for connecting ductwork which must be taken apart periodically for cleaning purposes, or for fire damper breakaway installations.

- Unlike many foam tapes this gasket has a memory which enables it to move with the duct flange as the duct system energises and de-energises on a regular/daily basis.
- Conveniently, the tape is paper backed and incorporates a simple low-adhesive strap to prevent the tape roll from unravelling on site.
- Excellent for use between duct flanges to produce airtight seal.

Why Closed Cell?

The air bubbles in the foam are completely surrounded by the plastic/rubber material. A major purpose of the foam is to keep water vapour from getting in and condensing within the chilled area, therefore Closed Cell foam is the only way to go.

Premium quality tape most effectively reduces leakage between Duct connections

AVAILABLE NOW

Density 100kg/m³

Water Absorb Rate <1%

Shore Hardness 15-20

Operating Temperature Range
-30°C-110°C

Compression back strong rate
38%

Tensile Strength 500KPa

Elongation 20%

Tape Dimensions

Length 1500mm

Width 15mm

Thickness 5mm

Roll Dimensions Φ 355mm x 15mm

Gross Weight 125gram

Ideal for Round, Flat-Oval And Rectangular Duct Connections

- Pressure sensitive adhesive backing
- Synthetic closed cell tape
- Simple and easy to install

PRODUCT CODE	DESCRIPTION	UOM	Order Multiple
DW-PMG15	Pressure-Memory Gasket 15mm Wide, 1500mm Long, 5mm Thick	Roll / Ctn	100
